

Number 9:1

Increasing Processor Utilization in Hard Real-Time Systems with Checkpoints . . .	5
..... <i>Alan A. Bertossi, Massimo Bonometto, and Luigi V. Mancini</i>	
Aperiodic Servers in a Deadline Scheduling Environment	31
..... <i>T. M. Ghazalie and T. P. Baker</i>	
Analytic Evaluation of Contention Protocols Used in Distributed Real-Time Systems	69
..... <i>Kang Shin and Chao-Ju Hou</i>	
Contributing Authors	109

Number 9:2

Formal Specification and Compositional Verification of an Atomic Broadcast Protocol	119
..... <i>Ping Zhou and Jozef Hooman</i>	
Analysis of Hard Real-Time Communications	147
..... <i>K. Tindell, A. Burns, and A. J. Wellings</i>	
Support Software for the Development of Programmable Logic Controller Applications	173
..... <i>George Hassapis and John Papadopoulos</i>	
Contributing Authors	195

Number 9:3

Allocating Fixed-Priority Periodic Tasks on Multiprocessor Systems	207
..... <i>Yingfeng Oh and Sang H. Son</i>	
Analysis of Railway Stations by Means of Interval Timed Coloured Petri Nets	000
..... <i>W. M. P. van der Aalst and M. A. Odiijk</i>	
On Tasks Synchronization with the MMS Protocol	000
..... <i>Justin N. Akazan and Zoubir Mammeri</i>	
Fast Heuristic Scheduling based on Neural Networks for Real-Time Systems	000
..... <i>Ruck Thawonmas, Goutam Chakraborty, and Norio Shiratori</i>	
Contributing Authors	000
